Profile

Front-End Developer with expertise in building modern, responsive, and user-friendly web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Passionate about writing clean and maintainable code and solving complex problems. Strong focus on performance optimization and collaborative teamwork, with hands-on experience in bringing ideas to life through real-world projects.

Projects

E-commerce Store (Next.js + TypeScript) 2024 July – present

- Developed a dynamic product listing page with filtering, sorting, and cart functionality.
- Integrated TypeScript for type safety and cleaner, more maintainable code.
- Designed a modern UI with Tailwind CSS ensuring a smooth shopping experience.

GitHub Finder App (React + API, Bootstrap) 2024 Aug – present

- Created a GitHub user search app with live API integration.
- Displayed user profiles, repositories, and follower counts with Bootstrap styling.
- Added error handling and loading states for better UX

CRUD Application (React.js) 2024 Sep – present

- Implemented Create, Read, Update, Delete functionality for managing data entries.
- Used React hooks for efficient state management.
- Designed a clean UI that allows smooth interaction with dynamic data.

Card Shuffling Game (React.js)

- Developed an interactive memory-matching game with randomized shuffling logic.
- Used React state to track card selections, matched pairs, and game progress.
- Added animations and smooth transitions to enhance user engagement.

Education

Bachelor's in Computer Science
Shaheed Zulfikar Ali Bhutto Institute of Science & Technology, Islamabad Campus
